Part of Paper No.

Application/Control Number: 09/833,047

Art Unit: 1617

Applicant's election with traverse of "CMC" on page 20 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that prosecution on the species in the parent is complete. This is not found persuasive because Prosecution on the parent is independent from prosecution of the instant case, a further election of species is required:

The requirement is still deemed proper and is therefore made FINAL.

A FURTHUM OF SPECIES IS REGULAGES

Claims 1, 2 are generic to a plurality of disclosed patentably distinct species

comprising Characteristic use agents. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Webman whose telephone number is (703) 308-4432. The examiner can normally be reached on Monday to Friday 9 Am 5 PM.
